

Data Warehousing & Data Mining (R20) Imp Questions:-

Unit-1:-

1. Explain Data Warehouse Architecture for parallel processing.
2. Discuss about Data Warehouse Models.
3. Explain Meta Data Repository.
4. Explain Multidimensional Data Model using Data Cube
5. Explain type of various Data Warehouse Schemas.
6. What are differences between OLTP and OLAP
7. Discuss various OLAP Operations
8. Explain Data Warehouse Implementation
9. What is the role of Concept Hierarchies in Data Warehouse?

Unit-2:-

1. What is Data Mining? How Knowledge is Discovered from Data
2. Explain various Data Mining Techniques (or) What kind of patterns can be mined
3. What are the major issues in Data Mining?
4. Discuss various applications where Data Mining is used
5. What are Data Objects and Attributes? Explain in detail.
6. Explain Basic Statistical Descriptions of Data.
7. Discuss various steps involved in Data Preprocessing.

8. Explain Data Visualization Techniques.

Unit-3:-

1. How different Patterns are Mined in Data Mining Process to get Association and correlations by using Market Bucket Analysis.
2. Describe various Mining Models
3. What is Pattern Mining and give the classification of Pattern Mining?
4. Explain Pattern Mining in Multilevel and Multidimensional space.
5. Define Constraint based frequent pattern mining. Explain type in Constraint frequent pattern mining.
6. Discuss Metarule-Guided Mining of Association Rules
7. How mining is classified using frequent patterns
8. Explain Classification using Backpropagation Algorithm
9. Explain FP- growth Algorithm.
10. Explain Apriori Algorithm
11. Explain Pattern Evaluation Method

Unit-4:-

1. Describe in detail Decision Tree Induction
2. Explain Bayesian Classification in Frequent Pattern Mining
3. Discuss Rule Based Classification
4. Explain Classification by Back Propagation
5. Explain about Vector mechanisms

6. Discuss K-Nearest -Neighbor Classifiers and Case Based Reasoning
7. Describe Techniques to improve accuracy .
8. Describe Decision Tree Induction using Hunt's Algorithm.
9. Explain Model Evaluation and Selection?
10. Explain Lazy Learners ?

Unit-5:-

1. What is Cluster Analysis? Explain Clustering Techniques in brief
2. Explain about partitioning methods in Cluster Analysis
3. Describe Hierarchical methods in Cluster Analysis
4. Explain Grid Based methods in Cluster Analysis
5. Explain how Clustering is done for High Dimensional Data
6. Explain Clustering with Constraints
7. What is Outlier Analysis? Explain Outlier Detection Methods
8. Explain the different types of Clusterings.
9. Explain Density based methods?
